10. Scoring

- i) Having rounded the last mark after the shortened course has been signalled, boats will have their elapsed time taken as they cross the finishing line. The final corrected finishing times will be notified after racing.
- ii) Boats that complete a race will be scored using their average lap time. This will be calculated as a boat's actual elapsed time in the race divided by the number of laps it has sailed and multiplied by the highest number of laps completed by any competitor in the race to produce an average elapsed time. The corrected time for each boat will then be calculated by applying the appropriate PN to the average elapsed time.
